

Come Make Your Own Marshmallow Catapult

Cornell Cooperative Extension of Lewis County

Cost: \$2.00 per participant

Registration is required! No walk-ins.

Limited sign ups. *All social distancing guidelines will be followed!*

OVERVIEW

Marshmallow catapults are not only fun to play with, but also provide an educational demonstration on energy. Potential energy is the stored energy in an object at rest. Kinetic energy is exerted by an object in motion. Catapults use stored energy to launch objects. When a catapult is in the loading position, it holds potential energy. As the arm of the catapult releases, it exerts kinetic energy. Your challenge is to build a catapult that will launch a marshmallow six feet. Good luck!

Location: Cornell Cooperative Extension of Lewis County

7395 East Road Lowville, NY 13367

Date: Saturday September 19, 2020

Time: 10:00am – 11:00am
